I am hoping to learn more about Mexico in our class. I already know they speak Spanish there and the capital is Mexico City. The Catholic religion is popular there more than here. I have heard the government is corrupt or crooked and there are lots of murders about drugs lately. I know they close down business in the afternoon for *ciesta* unlike the US where we work all the time.

I would like to know what the kids' hobbies are, what the popular jobs are, and what sports they play. Plus I want to know about their houses and living conditions like what they eat, etc.
